ABOUT FLUAD QUAD:

- Lower risk of medical encounters due to influenza-related outcomes, including hospitalisations and GP Visits.
- Longer protection – Antibody levels are higher at 12 months post vaccination.
- Established safety profile with more than 270 million doses distributed worldwide.

ABOUT FLUCELVAX QUAD:

- Designed to be an exact match to the flu strains that are circulating this year.
- Shown to be up to 19% more effective than standard influenza vaccines at protecting you from the flu.
- Established safety profile with more than 200 million doses distributed worldwide.
